Coupe A-A
Echelle : 1:1

Our designers Alain & Dominique Vavro work with two heads, four hands, and thousand colors. Sensitized to the vibrations of the masters' paintings, Mondrian's constructions, and the furious Picasso, they remain faithful to pens, pencils, paintbrushes and tracing paper, allies that enable them to extend their ideas and catapult their images.

Dubbed by the greatest, including Bocuse, they have explored for more than twenty years, the constantly changing world of porcelain and tableware. Depositories of the designs for Ariane Fine Porcelain's new collections, they lend their experience and sensitivity at the service of this great project: to make of this company an aesthetic leader of high-end porcelain tableware.

Quality without Compromise

Dishwasher Safe

Our extremely high firing temperature allow colors, patterns and design elements to fuse permanently with the body of the product, making it highly resistant to repeated dish washing cycles at any temperature.

Limited Danger in Case of Breakage

The products are designed to avoid breakage hazards, as they break cleanly into safely manageable pieces.

High Chip Resistance

The significant composition of high alumina raw material offers strength and resistance against chipping at critical points such as edges of cups, plates and handles. This configuration reinforces the porcelain, reducing risk of breakage and increasing the product's endurance.

Thermal Shock Proof

Ariane Fine Porcelain not only retains heat to keep the food warm, but is also resistant to variations in temperature.

Microwave & Salamander Safe

High temperature firing imparts safety from microwave and salamander deterioration.

Absolute Functionality

All our designs focus on sheer functionality to conform to industry guidelines. Most of our items are stackable including cups, bowls and platters, a design ingenuity that facilitates efficient optimization of space.

Sleek & glossy Appearance

The special glaze fired at high temperatures not only gives all our products a smooth and polished finish, but also ensures a non-porous surface for higher levels of hygiene.

Abrasion Proof

The extraordinary glazing fired under highly controlled conditions ensures strong resistance to scratches and abrasions.
