A Hamilton Beach Commercial submersible glass washer is shown on a stainless steel countertop. The device is black and silver, with a handle and a power cord. It is surrounded by several white and black brushes. In the background, there are glassware on a shelf. Two circular callouts are overlaid on the image: a blue one with white text and a grey one with white text.

UNIQUE FEATURES

Upright Glass Washer

Upright - Features a quiet, totally enclosed motor. Upright design easily fits any sink, needs no special plumbing, and is portable.

High Performance - Five automatic brush washers quickly and effectively remove all kinds of soil, including dried juice pulp and even lipstick.

Unique Brush System - Four standard-size brushes and one 8" center brush tackle tough cleaning jobs. Taller center brush cleans tall glasses better and ensures that all outside edges are cleaned.

Safety Features - Ground fault circuit interrupter plug and Sure Grip™ feet for added safety

Durability - Self-lubricating, non-corrosive bearings offer reliable, long-lasting performance.

Specifications:

Standard: Unit comes with base, 4 standard-size brushes, one 8"/20 cm center brush, and Sure Grip™ feet

Controls: On/off switch

Motor: 1/3 Hp

Electrical: 120 V, 60 Hz, 250W

Weight: 26 lbs

120V Specifications:

120V~, 60 HZ, 250W

Submersible Glass Washer

Submersible - Features an enclosed, quiet, submersible motor. Maintains warm water temperatures for high-performance cleaning. The submersible glass washer saves space, fits any sink, and needs no special plumbing.

High Performance - Five automatic brush washers quickly and effectively remove all kinds of soil, including dried juice pulp and even lipstick.

Unique Brush System - Four standard-size black/white brushes and one 8" center white brush tackle the toughest cleaning jobs. The taller center brush cleans tall glasses better and ensures all outside edges are cleaned.

Safety Features - Ground fault circuit interrupter plug for added safety and Sure Grip™ feet.

Durability - Self-lubricating, non-corrosive bearings offer reliable, long-lasting performance.

Specifications:

Standard: Unit comes with base, 4 standard size brushes, one 8" center brush, and Sure Grip™ feet

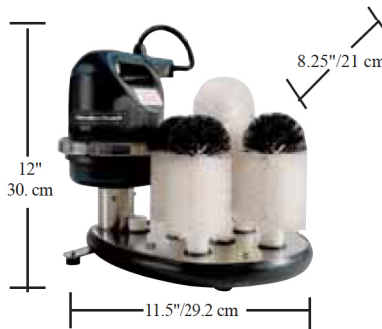

Controls: On/off switch

Motor: 1/3 Hp

Warranty: 1 year parts & labor

120V Specifications:

120V~, 60 HZ, 470W

Heavy-duty Celcon® gears stand up to years of washing

Brushes fit securely into slots for durable brush attachment — no tab to break off

Why Buy A Glass Washer?

- Costs less than a cabinet or under-counter washer
- Very little maintenance
- More efficient and effective
- Fewer glasses may be needed
- Less glass breakage
- Bar is always tended
