230V

UNIQUE FEATURES

Summit® Blender

Auto Blend "One Touch Sensor Blending" - Patent-pending technology continuously monitors blender's power usage and speed to determine when the perfect drink consistency is achieved.

Hundreds of Pre-Programmed Cycles - Reduces the need to select different cycles for different drinks to free up decision-making time.

Quiet Shield™ - Sound enclosure reduces blender noise

Super-Creamy Drink Profile - The Wave~Action® System, along with speed and blade design, break down ice from a granita texture to a creamy drink profile.

Cavitation Control - Detects when cavitation occurs and prompts the operator to add more liquid. Keeps the operator from spending time watching the blender and from serving a bad drink.

Airflow Baffle - Constantly circulates cool air around the motor for back-to-back blending and longer blender life.

Jar Pad Sensor - Turns off motor when container is not in place to reduce grinding and "wear and tear" from misuse. (120V only)

Quiet Shield™ Sensor - turns off motor when operator lifts quiet shield (230V only).

Specifications:

Standard: Unit comes with base, one 64 oz./1.8 L stackable polycarbonate container, sealing gasket, Quiet Shield™ sound enclosure, and 3-wire grounded cord and plug

Controls: Touchpad

Motor: 3 Hp

Weight: 23.32 lbs / 10.57 kg (shipping)

Warranty: 2 years or 20,000 cycles

120V Specifications: 120V~, 60 HZ, 13 A
HBH850

230V Specifications:

HBH850-CE

HBH850-UK

HBH850-CCC

220-240V~, 50-60 HZ, 880W

Auto Blend stops blender when drinks reach the perfect consistency

Dual fans automatically keep motor cool in-between blends

Unique airflow baffle keeps motor cool and prevents water ingress

USB Port for future program updates

Converts for in-counter use
