HTS450 / HTS455 Toasters Heavy-Duty

AVAILABILITY:

HTS450 120V 230V

AVAILABILITY:

HTS455 208V 240V

UNIQUE FEATURES

Heavy-Duty 120V Toaster

Fast, Excellent Results - Ceramic elements heat evenly and quickly for a toasting output of 400 slices an hour. Bread guides center bread and hold it upright for even toasting.

Bread/Bagel Flexibility - Bread-to-bagel switch lets operators choose their preferred setting for maximum toasting flexibility and convenience.

Reliability - To reduce wear and tear, this heavy-duty toaster is equipped with a magnet-based bread lifter with fewer moving parts.

Safety Features - Unlike traditional open coil elements, heaters are lined with ceramic for damage resistance and long life. Toaster shuts off automatically, even if toast is jammed.

Solid-State Temperature Sensor - Automatically adjusts toast time for consistent toasting results.

Specifications:

Standard: Unit comes with toaster and heavy-duty removable crumb tray

Controls: 2 bread/bagel switches, 2 browning control dials, 2 cancel buttons

Slot Width/Depth: 1.3 inches/5.4 inches

Weight: 21 lbs / 9.53 kg

Warranty: 1 year parts & labor

Heavy-Duty 208/240V Toaster

Fast, Excellent Results - Ceramic elements heat evenly and quickly for a toasting output of 480 slices an hour. Bread guides center bread and hold it upright for even toasting.

Bread/Bagel Flexibility - Bread-to-bagel switch lets operators choose their preferred setting for maximum toasting flexibility and convenience.

Reliability - To reduce wear and tear, this heavy-duty toaster is equipped with a magnet-based bread lifter with fewer moving parts.

Safety Features - Unlike traditional open coil elements, heaters are lined with ceramic for damage resistance and long life. Toaster shuts off automatically, even if toast is jammed.

Solid-State Temperature Sensor - Automatically adjusts toast time for consistent toasting results.
